"ABIE'S IRISH ROSE"

R. D. Vanhook has taken over the British American Oil Company's business in Chinook. It is expected that next spring the

company will erect a tank and oil warehouse, when the local dealer will be able to take care of a larger volume of business.

LOCAL ITEMS

The principal and trustees request that pupils of all grades will commence at the beginning of the school term on Tuesday next, Sept. 3rd, as it will considerably facilitate arranging of classes.

Mr. and Mrs. Philip S. and son Bert, of Steele, North Dakota, visited last week at the home of Mr. and Mrs. F. Otto.

Mr. and Mrs. J. L. Carter, with Dorothy and Allen, left here by car on Sunday for their new home at Lacombe. Mr. Carter will return the end of the week and remain here for a few days.

G. J. Benbow, pianist of Oyen, will consider visiting Chinook for purpose of giving Piano Theory and Harmony Tuition, providing he is guaranteed a large enough class. Pupils prepared for Royal Academy or Toronto Conservatory examinations. For further information write Box 54, Oyen.

Just Arrived! A large stock of School Supplies. Everything the children will need for school. Place your order for text books early. E. E. Jacques, druggist.

Mr. and Mrs. J. Connell and family arrived from Lacombe on Wednesday to make their home in Chinook. Mr. Connell will take over the Acadia Hotel on Sept. 1st, and will endeavor to improve the accommodations and make this more homelike.

Mr. and Mrs. Neff arrived home Wednesday evening from their trip to Ontario.

Lavern Dobson of Calgary, who has spent his summer vacation with his grandparents, Mr. and Mrs. Fred Otto, left Tuesday night for his home.

A farewell party for Willie Thompson was held in the school hall on Tuesday, Aug. 27th. The evening was spent in dancing, after which lunch was served. W. Hughes then presented Willie Thompson with a pair of military brushes from a few of his friends. A few speeches were made, and Willie replied in a very nice manner. A very pleasant evening was spent by those present.

The regular monthly meeting of the Women's Institute will be held at the home of Mrs. S. H. Smith on Wednesday, Sept. 4th. Card call to be answered with the name of your favorite flower.

Mrs. Willis of London, Ontario, has been visiting at the home of her brother, Mr. McIntosh, for the past few weeks.

There will be no meeting of the Card Club next week or until further notice.

Roy Mart arrived in Chinook on Tuesday and will again take over the Acadia Hotel dining room.

Complimentary to Mrs. Wm. Hughes, Mrs. O. Nelson entertained at her home last Friday evening. The entertainment took the form of a miscellaneous linen shower, the various articles being presented to the bride in an appropriately decorated box. The guests spent the evening embroiling designs on the various gifts. Later dainty refreshments were served. Mrs. C. W. Rideout presided over the prettily arranged tea tables.

An accident which might have proven fatal at the C.N.R. dam north of here on Thursday when one of the workmen on the pipe line was severely burned. A joint in the steel pipe line had to be broken, so narrow trench was dug between eight and nine feet deep and wood for a fire put in place. Whether gasoline was used or the torch exploded is not known, as the victim was alone at the time. Being closely confined in the trench two shirts were practically burned from his body, also the hair from his head. The unfortunate man was taken to Youngstown for medical aid and then to Hanna hospital. It is reported the patient is doing as well as can be expected.

No Discrimination By Farm Loan Board

At the U.F.A. convention held at Oyen last month much criticism was offered by some applicants concerning reply received from the Government Farm Loan Board. It was thought at that time that the Board were considering the placing of restrictions on certain areas, which, if carried out, would no doubt have worked a hardship in many cases.

However, during the past week we have been informed that there is to be no discrimination made by the Board in any area, and that all applications will be considered on their merits.

The Montreal Gazette publishes the following special dispatch from Ottawa, dated Aug. 24th: "Good progress has been made by the Canadian farm loan board, which was established by an act of parliament for the benefit of the Canadian farmer in providing him with capital at a reasonable rate of interest for the legitimate development of his farm operations. The board was organized four or five months ago, and the first cheque was issued on June 1st.

"Since the board opened for business, 394 applications for loans have been received at the head office in Ottawa, of which 284 have been approved, 56 are pending and 14 have been rejected. The average loan in British Columbia has been \$3,168, in Alberta \$2,025, in New Brunswick \$1,767 and in Nova Scotia \$1,242.

District Conference of Women's Institute

The Acadia West Constituency held their annual conference at Little Gem on Aug. 21st, with about 60 in attendance. In the absence of the convener, Mrs. Clark Fraser acted as chairman.

The meeting opened by singing "O Canada" and repeating the creed. The address of welcome was given by Mrs. Stitt of Little Gem, and replied to by Mrs. McNaughton of Youngstown. The minutes and financial statement from previous conference were then read and adopted.

Then followed the reports from the local institutes: Cereal, Mrs. Hille; Youngstown, Mrs. Coad; Little Gem, Miss Jarvis; Chinook, Mrs. Chapman; and next reports from standing committees.

Child welfare and public health, Mrs. Dibble, Cereal.

Agriculture, Mrs. McLean, Cereal.

Education and better schools, Mrs. Esler (convener), paper was read by Mr. McLean, Cereal.

Household economics, Mrs. Hille, Cereal.

Canadianization, Mrs. Lowney, Cereal.

The convenors for legislation, Canadian industries and immigration were absent and sent no reports.

Mrs. Selkirk of Cereal was elected constituency convener.

The constituency dues were fixed at \$5 from each Institute for next year.

The conference to be held in Youngstown next year.

The programme which followed was much enjoyed.

Piano solo, Mrs. Roberts.

Recitation, Isabel Tait.

Solo, Miss Goodman.

Vocal duet, Mrs. Richards and Miss Cunningham.

Solo, Mrs. Isbister.

Mrs. Ferguson of Frochou then gave a splendid address on "What citizenship should mean" to us women."

Solo, Mrs. Richards.

"God Save the King," after which the visitors were all entertained to a dainty tea served by the Institute members of the Little Gem local.

During the past week Cooley Bros. delivered a new Ford Tudor sedan to Ed. Dare, and disposed of three second-hand cars.

The Pyramids of the Prairies

The Pyramids of Egypt were built for the glory of ruling destiny by toiling myriads of slaves and with wealth wrung from needy tax-paying citizens. Generation after generation of desperate toil with primitive tools built these gigantic monuments, the pride of a ruling class.

The Wheat Pool farmers of Western Canada are building an infinitely more serviceable monument—a great system of elevators owned by themselves and operated for their protection and benefit. By means of an annual contribution of two cents for each bushel of wheat the Pool members of Alberta have provided over six millions dollars for the construction of their elevator utilities. Bound together by the ties of co-operation, these Pool farmers are working out a plan for their own economic freedom.

The clear-sighted, far-seeing Pool member is extremely loyal to his own elevator system, realizing its value. Not only are Pool elevators operated for the Pool membership at bare cost, but they provide a strong shield to guard the welfare of the producer.

The Wheat Pool Expects Every Pool Farmer To Do His Duty

WHEREVER POSSIBLE

Patronize Pool Elevators

Drowned In North

The Calgary Herald last week contained notice of the death of Jno. W. Carpenter who was drowned on Aug. 12th about 1500 miles north of Edmonton in the Great Slave Lake country.

Jack Carpenter was the only son of Dr. G. Carpenter, principal of the Institute of Technology and Art at Calgary, was only 19 years of age. He was a member of four who were

on a prospecting survey for tin, and had gone into the north land

later to Dr. Carpenter, care of Dr. H. H. Bingham, First Baptist church, Calgary, in a wire sent

from Fort Resolution, N.W.T., by J. O. Howells, mining engineer for the Northern Syndicate Ltd., head of the prospecting party to which young Carpenter was attached.

Details of the drowning are not yet to hand, but Mr. Howells is on his way out by plane to Cal-

gary. The party were in so remote a district that the poor lad had to be buried temporarily on Union Island, Great Slave Lake.

It is all the more sad that Dr. and Mrs. Carpenter are at present on a motorizing tour and had not been able at the end of last week to be communicated with. The lad's only sister, who is a nurse in training at a hospital in Calgary, has had to bear the burden of the great loss alone for at least a time.

Jack Carpenter was a great favorite in Chinook, having visited here last year at the home of Mr. and Mrs. R. Stewart, whose son Harold was a class mate and close friend of his. In fact Harold had one time made plans to be a member of this expedition. Much sympathy is expressed here for Dr. and Mrs. Carpenter and daughter in their great loss.

Mrs. Harry Smith and Mrs. Bacon were joint hostesses to a bridge party on Tuesday evening of last week.

The High Cost of Sickness

Ten billion dollars a year, or one-ninth of the annual income of the United States, goes to that country to pay for illness or to repair damages inflicted by it, according to one responsible authority quoted in a recent issue of "The Literary Digest."

It is doubtful if in Canada the necessary information is available and data compiled to enable an estimate to be made of the costs of sickness to the Dominion as a whole. Probably in this more northern climate and less congested centres of population, sickness is not quite so prevalent, although, on the other hand, owing to the distance which many of our rural population are from doctors, hospitals and nurses, the average cost per patient may be somewhat higher than across the line.

Some of the figures quoted by "The Literary Digest", as applicable to the United States may, therefore, be not so very far out in their relation to Canada. At all events, they are arresting and thought provoking.

It is stated that the average individual between the cradle and the grave spends one-fourth of his time in bed because of incapacitating illness, and that for the same reason the average worker loses two per cent. of his time, or a fraction more than seven days a year.

The people of the United States, it is asserted, are paying for the treatment of disease not less than \$2,500,000,000 a year, or approximately \$100 per family. In addition there is an estimated annual loss of \$2,000,000,000 as a result of decreased wage-earning capacity. And there is a still further permanently interrupted wage-earning capacity through post-poneable deaths, estimated to be \$6,000,000,000, making the total annual cost of disease to the people of the United States, \$10,000,000,000. The total annual income of the country is about \$90,000,000,000.

Can any people afford to pay such a staggering sum, constituting, as it does, such a large proportion of their total income on such a non-productive, destructive thing as disease and preventable deaths? The United States census returns makes answer. According to this official compilation, 49.7 per cent. of patients in general hospitals, in 1923, were able to pay in full; 19.3 per cent. of patients paid in part, and 31 per cent. patients paid nothing. While no reliable data is available as to the extent that patients paid for the services of physicians, it is reasonable to suppose that physicians were paid at much the same ratio as the hospitals. If, so then only about one-half of the people paid in full for services required as a result of illness; 20 per cent. paid in part, while 30 per cent. paid nothing.

The conclusion reached is, that for the great mass of families with incomes below \$1,200 a year, there is only one of two alternatives when sickness overtakes them—medical charity or financial tragedy.

The further conclusion is reached that there are just two ways for lowering the cost of medical care. One way is by the prevention of unnecessary disease—certainly the best and safest way—and the other way is through the use of an organized medical service.

An organized medical service, it is pointed out, can be offered for financial returns considerably smaller than the cost would be if the patient obtained the same service from unrelated practitioners and specialists. An organized service makes possible economies which are not possible in an unorganized service. Certain examples are cited:

Through an organized medical service, some of the large universities are able to render a thoroughly modern medical service, including hospital care, to their students for from \$9 to \$12 per student a year.

The Endicott-Johnson Corporation with its 16,000 employees and their families represent a population of approximately 60,000 people. The Corporation gives these employees and their families a medical service which includes the full-time services of 27 physicians, 3 dentists, 1 X-ray technician, 51 nurses, and 2 pharmacists, for an annual cost of \$6 to \$7 per capita for the whole industrial population.

The industrial settlement of Roanoke Rapids, North Carolina, composed of workers of five cotton mills and one paper mill, gives a modern, efficient medical service, including hospital care, home visits, and public-health nursing, for \$23.60 per family, or at approximately \$9 per capita.

The insurance principle is urged as the remedy, and an effective one, for providing adequate medical care for a very large percentage of the people, and it is believed that insurance companies will, in time, embrace it as a part of their protective programme.

Add New Export To Canada's List

British and German Dealers Repeat Order For Fresh Salmon

A new product has been added to the exports of Canada to Britain and Germany in the shape of fresh Gaspé salmon. A few weeks ago a trial shipment of fresh salmon, frozen by a new brine solution invented by the fish as fresh as when it was taken out of its native waters, was sent to British and German fish dealers, who were so pleased with the result, that an order for 25 tons soon followed. Many more orders are expected.

Some of the wells drilled in rock salt deposits in China in order to pump up the brine are as deep as 2,000 feet.

It is estimated that there are 44,000 thunder storms occurring daily on the earth.

Canada Wild Life
Shipped To Ireland
Seen By Express To Zoological Gardens At Dublin

Noah's Ark on a small scale passed through Montreal recently in the form of a shipment of Canadian wild life on the way from Toronto to the Zoological Gardens at Dublin, Ireland. This special shipment was handled by the Canadian National Express, the crates being transferred from Bonaventure Station to the SS. Lord Antrim, which carried bird and beast to the Irish Free State. The consignment consisted of two bears, one eagle, two woodchucks, two raccoons and four prairie dogs.

DO YOU VALUE HEALTH?

Sickness Almost Always Due To Weak, Watery Blood

If your health is poor; if you are pale, nervous and easily tired; if you suffer from rheumatism or aches; if there are touches of indigestion, or twinges of rheumatism, you may depend upon it that your health is in an impaired condition of the blood, and that unless this condition is remedied a complete breakdown may follow. To help you in this condition, Dr. Williams' Pink Pills will furnish the perfect medicine. The whole mission of this medicine is to build up the blood, promote appetite and good digestion, and strengthen tired, aching nerves. Men and women who have suffered from the use of this medicine, therefore if you are weak or ailing, give Dr. Williams' Pink Pills a fair trial and you will be pleased with the results.

Among the thousands who have found Dr. Williams' Pink Pills a real blessing is Mrs. Geo. M. Andrew, of St. Paul, Minn., who, after her experience with Dr. Williams' Pink Pills was an ailing young girl, has been completely restored to health. Then a few years ago I became very ill and ran a high fever. My husband got a supply of the pills for me. I gave them a good trial and when my baby was born she was a big healthy baby and I did not have any more sickness. My friends all say that they are well. I am now in full health and feel that way, and I give all the credit to Dr. Williams' Pink Pills. I hope my experience will help some other woman who needs a good medicine.

You can get the pills from your druggist, or by mail at 50 cents a box from Dr. Williams' Medical Co., Brockville, Ont.

Honored Carrier Pigeon

Murk Plaque To Its Memory Unveiled At Verdun

The heroic City of Verdun saw the unveiling of perhaps the most novel war memorial in the world.

It is a marble plaque to the memory of the last carrier pigeon, No. 767-15, which on June 4, 1916, left the besieged fort of Vaux amid a storm of gas shells and machine gun fire.

It carried a message from Major Raynal, the commander of the fort, which read:

"We are still holding out, but we are meeting a very dangerous gas and smoke attack. It is urgent to get us out. This is my last pigeon."

This pigeon got through and was awarded the Legion of Honor and the Croix de Guerre. It was kept in the army pigeon headquarters as a pensioner until it died about four years ago.

Many infants are infested by worms which cause great suffering, and if not promptly dealt with may cause constipation. Minard's Worm Powder will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only will it help to remove worms and injuries to the organs that worms cause and restore them to soundness.

It is always hard to convince a pretty girl that love is blind.

Beauty may be merely skin deep, but it is nearly always effective.

WOMAN SO SICK COULD NOT WORK

Helped by Taking Lydia E. Pinkham's Vegetable Compound

Grainland, Sask.—"I am glad that I heard of that good Lydia E. Pinkham's Vegetable Compound and I will not be without it again. I was so sick at the time I could not sew on the machine. My husband and I are the users of Lydia E. Pinkham's Vegetable Compound now."

"I am telling all of my friends how good it is and I will answer all letters I get from women,"—MRS. MARY SCHULTEIS, Grainland, Sask.

Studies Alberta River

U.S. Engineer Works On Problem To Prevent Mississippi Floods

With a view to obtaining information which may lead to the offsetting of Mississippi floods, George Archibald of the Corps of Engineers of the U.S. War Department is investigating Canadian storage facilities in the hope that if the peaks of the floods of the Milk River in Alberta and its tributaries in Saskatchewan were smoothed off by the construction of reservoirs, the condition of the Mississippi area might be changed for the better. He intends to study intensely the conditions at the headwaters of the Milk River on the eastern slope of the Rockies near the Montana border. From its source here the Milk River flows north into Canada and then turns south again, its waters finally flowing into the Mississippi.

It is estimated that there are 44,000 thunder storms occurring daily on the earth.

The art of pottery dates back as far as we can trace the human race.

Seeing Persia From Air

Takes Eight Hours Compared To
Forty Days By Camel

Seeing the Euphrates from the air is one of the inducements being offered by the new air service that connects Bagdad and Gaza. The management claims that in no other way can the beauties of the river and of Persia be fully appreciated. The view of the serpentine river at the time the "wind of the morning" struggles to break through, is unusual. As the sun finally bursts forth in all its glory, the streams appear one more and more the appearance of a snake, twisting and writhing, its sides dazzling metal. A splendid view of the Dead Sea is also obtainable. The trip by air takes eight hours, compared with 40 days of travel by camel.

UNIVERSITY OF MANITOBA WINNIPEG

Offers, among others, the following

Noted Inventor Dear

Sir Ernest De La Rue Found New Way To Make Paper Mache Splints

—

—

—

—

—

Sir Ernest De La Rue, remembered largely for his invention of a new way of making paper mache surgical splints and boats in the world war, is dead at the age of 77 years. His method was adopted by the majority of the war hospital depots and he organized and financed a Dillingham branch, which turned out many thousands of splints and boats.

Sir Ernest was also noted as the inventor of the electric starting gate used by the Jockey Club, and as a designer and constructor of the whole of the decoration of the great Albert Hall, one of London's most famous gathering places.

Protected the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Historic Sites Board Have Marked For Perpetuation Another Group of Historic Places

The Historic Sites and Monuments Board of Canada met at Ottawa recently and marked down for perpetuation another group of historic sites.

One hundred and twenty-nine such sites have been marked with a permanent monument since the board commenced its labors in 1919. These marks stretch from the international border to the Arctic, from the Atlantic to the Pacific. There is a wooden pillar to mark the site where Sir Benjamin Franklin last camped; there are monuments large and small from monoliths to cairns, from pillars to tablets.

Only last year a monument was unveiled to mark the landing of Jacques Cartier at Ille aux Coudres on September 6, 1535. At this place was held the first Christian service in the land of Canada.

At the recent meeting of the board 125 other sites were reviewed and several recommendations were made for immediate markings. Among these the outstanding ones are:

Wolfe's Landing, Gabarus Bay, Cape Breton, where Wolfe's brigade landed on June 8, 1758.

First coal mine in Cape Breton—the site of the first regular coal mining operations in America, begun by the French in 1720.

Fort Ste. Anne, Cape Breton; site of an early settlement and Jesuit Mission established by the French in 1629.

Fort St. Peters, N.B.; site of a fortified post and trading station built by the French in 1650.

Minto coal mine, N.B.; to commemorate the discovery of coal by the French near the present town of Minto, soon after their occupation of Acadia.

Chambly Road, P.O.; the first road built in New France in 1650.

King Mountain, P.O.; site of the first triangulation station of the geometric survey of Canada, established in 1905 about 9 miles north of the City of Ottawa.

Quebec Seminary, Quebec; site of the first educational house in Canada, established by Laval in 1663.

The Normandale Furnace, Normandale, Ont.; founded in 1818 and operated until 1833.

Kingston, Ont.; commemorating the treaty signed with the Mississauga Indians, 1793, whereby a large tract of land in eastern Ontario was purchased for the settlement of United Empire Loyalists.

Fort Erie, Ont.; commemorating the enterprise and courage of the men of the Royal Navy and the Royal Marines in capturing the United States ships of war, Ohio and Somers, in the Niagara River, Aug. 12, 1814.

Bay of Quinte Carrying Place; commemorating the treaty concluded with the chief of the Mississauga Indians in 1787, by which a large tract of land in western Ontario was ceded to the Crown.

Quebec, B.C.; to commemorate the beginning in 1885 of the work on the Collins overland telegraph line, intended to link America and Europe by way of British Columbia, Alaska, Behring Straits and Siberia.

Fort Prince of Wales, Churchill, Man.; the most northerly fortress on the American continent, built by the Hudson's Bay Company in the years from 1733 to 1747 to safeguard the harbor.

Observed Minute's Silence

Tolling bells, sirens, and salvos of artillery fire reminded Belgians on August 4, of the fifteenth anniversary of the invasion of Belgium by the German Imperial armies, after they had been refused permission to pass through the country to combat the French. The population observed a minute's silence throughout the country.

"What is the matter with your little brother?"

"He can't count, and he has eaten more apples than he can hold." — Gullerice, Madrid.

"I can't understand it, madam. The last dozen I sold you were the very best Empire eggs."

"Yes, but are you sure it wasn't the Roman Empire?"

"Tommy, can you tell me one of the uses of cowhide?"

"Er, yes! It keeps the cow together!"

Pluck begets more happiness than luck.

Horticulture On the Prairie

Experimental Station Shows What Cao Be Done

A visit to the Morden, Manitoba, Experimental Station at this season of the year and indeed until the autumn frosts arrive, affords a rare treat to those who are interested particularly in fruit and vegetable crops.

Apples, plums, cherries, grapes, strawberries and cane and bush fruits are grown in large quantities and in many varieties.

Visitors will learn much to their advantage with respect to varieties worth trying at their own homes and will see the effect of a shelter belt in growing garden crops. The flower borders and beds present a blaze of colour and afford many useful lessons in varieties of the gladiolus and many other flowers and the best methods of their cultivation.

The report of the Morden Station, published by the Department of Agriculture, Ottawa, if reviewed in advance of a visit would greatly help the visitor to appreciate the things he would see and to systematize the study that his visit would afford.

Has Necessary Qualities

Human Hair Used In Mechanism For Sound Foghorns At Sea

A single human hair will support a weight of almost three to five ounces. It is thus almost as strong as a steel wire of the same diameter. Unlike steel wire, however, human hair is exceedingly elastic. It is also very susceptible to changes of climate and temperature.

This combination of qualities has led to its employment in the mechanism for sounding foghorns on buoys at sea. Some scores of human hairs are fixed side by side, like the hairs of a violin bow. These stretch in foggy weather, so opening a valve which releases enough compressed air to work the siren and compresses at regular intervals so long as the fog lasts.

Employees Following In Father's Footsteps

Second and Third Generation Working for Canadian National Railways

The transfer of the motive power shops of the Canadian National Railways from the old to the new building at Point St. Charles, Montreal, has revealed that out of some 1,422 employees on the register of the old building, 167 were of the second generation, 18 of the third generation, and two of the fourth generation of present or former workers in the same place.

Building a city is certainly as important as building a home. Why, therefore, should there not be as much care shown in planning a community as in planning a residence?

The King Of Fruits

People Should Give More Attention To Canadian Apples

Enthusiasts give this name to the apple, and there is need for more of these people in the Dominion.

In the order of their ripening the varieties line up as follows: Red Astrachan, Transparent, Chambaug and Duchess, followed in order by Alexander, Wolf River, Gravenstein, Wealthy, Colvert, St. Lawrence, Morden Blush, Blenheim, Ribston, Hubbard, Faneuil and McIntosh Red, the latter two being dessert apples. Many of these fall varieties will keep in a cool place until well into the winter.

The winter apples as they appear on the market are in the following order: King, Rhode Island Greening, and Wagener, but these are closely followed by other excellent winter varieties such as the Baldwin, Seek, Pewaukee, Ontario, Jonathan, Yellow Newtown, Spy, Golden Russet, Ben Davis, Stark, Fallawater, Roxbury Russet, Spitzbogen and Rome Beauty.

Information on the culture of the apple with hundreds of recipes covering practical uses for the apples will be found in a bulletin entitled "Canadian Grown Apples," which you may have on application to the Publication Branch, Department of Agriculture, Ottawa.

Bought Lower Grade Wheat

European Importers Took Large Quantity At Attractive Price

During the 12 months ended July 27, 1928, world shipments of wheat and flour amounted to 917,297,000 bushels as compared with 792,808,000 bushels for the previous corresponding period.

In that year of lower prices Europe became a more prominent figure in World Trade. It absorbed about 220,000,000 bushels which was approximately 90,000,000 bushels greater than the year before.

Considerable quantities of this was low grade wheat which, however, was of good milling and baking quality and was readily taken by ex-European importers at the attractively low prices.

Somebody Has To Pay

"Farm products cost more than they used to, I suppose," said a city visitor. "Yes," replied the farmer.

When the farmer is supposed to know the botanical name of what he's raisin', an' the entomological name of the insect that eats it, an' the pharmaceutical name of the chemical that will kill it, somebody's got to pay."

Building a city is certainly as important as building a home. Why, therefore, should there not be as much care shown in planning a community as in planning a residence?

It takes a mighty little shove to send some men down hill.

Four Research Projects Are Under Way With Object Of Improving Wool and Mutton

Movie Stars on C.P.R.

Wilma Bankey, favorite star of the movies, traveling Canadian Pacific to Montreal recently from Boston, to appear at a local theatre that was showing her latest release "This Is Heaven." Rod La Roque, her husband, took advantage of her visit to join her in Montreal, also coming by C.P.R. to Montreal. Thousands of movie fans welcomed the stars at the Windsor Street Station, Montreal, on their arrival.

Crop Almost Certain On Summer Fallow Land

This Cannot Be Said Of Spring Or Fall Ploughing

This year of extreme drought has illustrated clearly the fact that summer fallow land is almost certain to produce a crop, while spring ploughing, and even fall ploughing, may not.

Throughout the prairies, where damage from lack of moisture varies from district to district, it has become plain that those farmers whose acreage is sown mainly on spring ploughing, will finish the season relatively in poorer condition. And it is noticeable in what cases there are of crops being ploughed or pastured, that it is the spring ploughing, or occasionally the fall ploughing that is abandoned before summer fallow.

Summer fallow acreage, while it shows some decrease over 1928, is still a substantial part of this year's sowing and new breaking is larger in Alberta and Manitoba.

The following table gives the estimated acreages this season under summer fallow, new breaking and fall ploughing in the three provinces.

New Fall Summer Break-Ploughing

falling, ing, Man., Sask.,.... 5,579,917 521,637 2,961,000

Alberta.... 2,732,600 850,000 700,000

While a certain amount of abandonment of sown fields is taking place this season, there are some benefits which will tend to follow. Land ploughed up at this stage of the growing season will have almost as good a rest as genuine summer fallow, and should be more fertile next year. And farmers are also taking the opportunity of killing weeds by consistent ploughing of land where the natural strength of a crop does not preclude them. On the whole next spring there should be more land in good condition than for several years, especially in those areas badly affected by drought at the present time.

The Retort Courtois

A famous scientist was presented at a dinner, at which one of the guests began to deride philosophy.

He went on rudely to express the opinion that the word "philosopher" was but another way of spelling "fool."

"What is your opinion, professor?" he asked, smiling. "Is there much distance between them?"

The professor surveyed his boorish visage keenly for a moment, then, with a polite bow, responded. "Some times only the width of a table."

It is perfectly all right for a woman to want to hold on to her youth, but she should not do it while he is driving.

To improve both Canadian mutton and wool by establishing the required type of sheep, four research projects involving the Federal Department of Agriculture, the University of Saskatchewan, the University of Alberta, and the New Wool Research Laboratory being set up by the National Research Council at Ottawa, were authorized by the growers' section of the council's association committee on wool at Ottawa.

In the belief that definite improvements can be made over the present Canadian range varieties and valuable leadership given to ranchers by providing a basis for accurate advice to that end, Prof. J. P. Sackville, University of Alberta; Prof. A. M. Shaw, University of Saskatchewan, and W. H. Fairchild, Dominion Experimental Station, Lethbridge, forming a sub-committee, made the proposal that were adopted by the session.

Specifically selected fine-wool range ewes, numbering probably 200, to be used as the foundation of a carefully planned experiment in grading and cross-breeding, will be gathered at Saskatoon by the University of Saskatchewan. Stud rams of several long wool breeds may be imported from England or elsewhere. The more better known methods of genetics that will be applied in experimenting with them are expected to show results in a short time.

At the Lethbridge Experimental Station, tests of the Corriedale sheep so well established in New Zealand, will be continued. Hardiness and adaptability to range conditions are to be determined.

General environment conditions including, where feasible, such factors as temperatures, humidity, rainfall, age of sheep and feeds available will be studied by the University of Alberta, at Edmonton, and data along similar lines will be sought from the sheep growing areas of Saskatchewan and British Columbia as well. These conditions—it was noted, had considerable influence on the character and amount of wool produced.

For the fourth project co-operative work is to be undertaken with one or more ranchmen, between 500 and 1,000 ewes of uniform type being introduced to Corriedale rams. Information as to the wool produced will be studied in the wool laboratory that is being established in temporary quarters here pending erection of the new national laboratories building. Results of British researches in wool are being made available to the council's officials.

Announcement was made at the meeting that the full wool committee would hold its next meeting in Toronto, on November 18, the day before the opening of the Royal Winter Fair.

Those present, in addition to the sub-committee were: Dr. H. M. Tory, chairman; Dr. J. H. Gridle, Deputy Minister of Agriculture; A. A. MacMillan, Dominion Livestock Branch; G. B. Rothwell, Dominion Animal Husbandry; Prof. R. G. Knox, Ontario Agricultural College, Guelph, Ont.; W. H. J. Tisdale, assistant manager, Canadian Co-Operative Wool Growers, Toronto, and E. E. Lathe, secretary.

Mining Of Soda
A large plant is being installed at Last Chance Lake, near Beaver Dam and about 20 miles north of Clinton, B.C., for the mining of soda from the bottom of the lake. The mine will be operated by the British Columbia Chemical Company, Ltd., and it is expected to be operating within 90 days, with a shipping production of three carloads of soda per day.

About the only steps remaining that pedestrians may take to protect their rights are fast ones.

"Parlon me, but we have certain rights before me." "Heavens! How much do I owe you?" — Sondagansse-Strix, Stockholma.

Over 2,000 employees of the Canadian Pacific Angus Shops with wives and families took their August Bank Holiday picnic at St. Jerome, near Montreal, early in August. The famous fair at Hampstead Heath, London, held every year, was reproduced in the gathering which is the great event of the year for the Shops. Hero is shown the start of the Married Women's Race with an entry of thirteen contestants. Every conceivable game was represented from the sliding ladder to a typically English old-fashioned "coke-nut" shy. Prizes ranged from tennis rackets to watches and including many serviceable articles of wearing apparel. Eighteen races were run off.

WORLD HAPPENINGS
BRIEFLY TOLD

Canada was the principal country with which the United States traded in June, leading all the other countries in both exports and imports.

Erich Remarque, author of "All Quiet on the Western Front," may be the recipient of the next Nobel prize for literature. It was reported from Stockholm.

The British Columbia Government recently announced the distribution of liquor profits amounting to \$682,018.43 covering the six-months' period ended March 31.

The first represtation of the small crop in western Canada was felt at Sarnia, when the John Gooding Thresher Company reduced its operating staff by one-third.

Hon. Auley Morrison, Chief Justice of British Columbia, was among those who received the degree of doctor of laws at the convocation exercises at Dalhousie University, on August 26.

Closer co-operation in air transport matters throughout the world began between Great Britain and France, was discussed at a meeting of Lord Thomson and Laurent Eynac, respective Ministers for Air.

Miss K. Bloemfeld, 24, is the first woman in the state of Victoria, Australia, to gain an air pilot's license. She has passed her final tests—they were pretty severe ones at that—with flying colors.

The Graf Zeppelin's flight from Friedrichshafen brought forth a \$20,000,000 project for regular German-Russian-Japanese air service with terminals in each of the three countries. It was announced that plans for the scheme are completed.

Sir Frederick Williams-Taylor, of Montreal, general manager of the Bank of Montreal, has resigned to assume the position of vice-president of the bank. H. B. MacKenzie, formerly assistant general manager, succeeds Sir Frederick as general manager.

Big Jamboree Over

Many Friendships Made At Gathering Of Boy Scouts

Tens of thousands of boys trekked out of Arrowe Park, England, when camp was broken and the great world jamboree of Boy Scouts came to an end. Fifty thousand boys left for their homes in nearly fifty different countries.

The previous night was passed largely in leave-taking as big contingents of boys toured the camp and bade their comrades farewell. At dawn they began passing through the park on their homeward journey to far countries of the earth. They took with them the farewell message from the chief scout issued before he left the camp, the keynote of which was "From now on the scout symbol of peace is a golden arrow."

The total number of visitors was 214,422. The next jamboree will be held in 1933. The place will be determined at a conference to be held at Salsburg, Austria.

Development Of Peace River

Country Has Gone Ahead Rapidly In Last Few Years

The first shipment of grain out of the Peace River District, was made up of three carts of wheat hauled by team 85 miles from Varenna to Reno. There were no highways or telephones, and only two small rural schools then. Today, there are 1,650,000 acres under cultivation, with a prospective crop of 15,000,000 bushels. Population has increased from 3,000 to 50,000; there are schools, churches, flourishing stores, elevators, electric light plants, highways and telephones.

The farmer may hatch his chickens by electricity, raise them using electric light instead of sunlight, and finally fry them for the table by the use of an electric range.

A woman and a child are shown from the side, wearing plaid skirts. The woman is wearing a patterned top and a hat, and is carrying a small bag. The child is wearing a simple top and a plaid skirt.

Circus Manager: "The height of negligence to leave the door of the lion cage open."

Tamer: "Do you think anybody will steal your lion?" — Prager Presse, Prague.

Church At Jasper Is Soldier's Monument
Gift Of English Lady In Memory Of Her Son

Unique among the churches of Canada is the little church of St. Mary and St. George, of Jasper, which was consecrated recently by the Bishop of Edmonton. The building, a beautiful structure of stone and stucco, with a tiled roof, was built at a cost of \$17,000 from a design by A. H. Calderon, of Edmonton, and is a gift to the parish from a lady in England, who wishes her name to remain anonymous.

It was presented in memory of her son who was killed in war, and beneath the corner stone, which was laid last year by His Excellency The Governor-General, lies the testament which was found on the young man's body when he was carried out of "No Man's Land." The furnishings and fittings of the church were also the gift of the unknown donor, while the bell was presented by Viscount Willingdon.

May Kill His Art

Russian Who Makes Pictures In Human Hair Deplores Bobbed Fashion

G. Boruchoff, the Russian artist who has received a certain distinction for his pictures in human hair, fears that the bobbed hair fashion may kill his art. He needs long strands for his work, and the supply of them is becoming shorter, and shorter. At first glance Boruchoff's pictures are said to be indistinguishable from oil paintings. He blends the various shades of hair on his palette as an oil painter mixes his colors. His canvas is a piece of silk or linen cloth, and his brush a fine knitting needle. His method of weaving the hair into the cloth, he says, is similar to that used in making the famous Gobelin tapestries. Boruchoff started producing his pictures at 10 years of age when apprenticed to a hairdresser, and while a war prisoner in Germany he spent his leisure in practice.

VOGUE OF PLAITS

Fluttering plaited skirt is such an attractive fashion for growing girls in 6, 8, 10, 12 and 14 years as seen in St. Louis, with full hipline and simple bodices with necklines trimmed with plaited collar.

Longsleeves also have turn-back plaited cuffs. Neckline and hipline bows easily in red and white, with bows of and so inexpensive. Gingham check in printed violet in brown and white with brown velvet bows, maize shade shantung with bows omitted, and simple bodices with necklines with white organdy plaited collar and cuffs are dainty and practical suggestions.

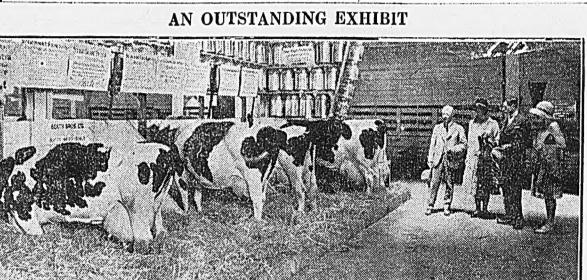

It can also be made with short sleeves as shown in small check. A plaided skirt will be delightfully smart, made of navy blue wool crepe with vivid red crepe de chine plaited collar and cuffs. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

AN OUTSTANDING EXHIBIT

In his address before the Rotary Club, during the Calgary Exhibition and Stampede, Hon. J. D. McGregor, Lieutenant-Governor of Manitoba, for many years Canada's most outstanding live-stock man, referred especially to the demonstration put on by the C.P.R. Supply Farm, of Strathmore, which emphasized productive possibilities of good dairy cows. Mr. McGregor said that he considered it to be the best, from an educational point of view, he had ever seen at any live-stock show.

As shown in the accompanying photograph, five cows of various ages were used to emphasize that high production increases profits. Two mature cows and one four-year-old heifer, one three-year-old heifer, and one two-year-old heifer were included in the group. Each of these had finished an official record within five months, and their total production for 365 days was 127,553 lbs. of milk. The first cow to the left, "Strathmore Sylvia-83340," by producing 29,371 lbs. of milk was recognized to be the highest milk producer in Canada to finish an official yearly record during the past year and a half. The second cow, "Belvedere de Kol Ruby-23,632," finished on June 14th, with an average of \$642.82 per cow. This

revenue returned more than \$475.00 per cow above feed costs.

The milk cans in the picture were used to illustrate the amount of milk produced in one year by Strathmore Sylvia. About one-sixth of the cans are visible in this picture. Altogether there were 479 cans—representing a production of 2,937 gallons of milk. This exhibit attracted a constant stream of visitors who spent a good deal of time studying the material attractively displayed on show cards.

There are approximately 600 purebred Holsteins in the famous herd at Strathmore, Alberta. The show herd of 15 head won 100 first prizes at eight major exhibitions in 1928. Under the advanced registry system of the Holstein-Friesian Association of Canada, there are 40 Gold Medal and 73 Excellent cows in the herd. This is the largest number of Gold Medals in any herd in the world.

The four-year-old heifer in line Strathmore Texaline Sylvia-111946, produced 23,830 lbs. of milk and 1,052 lbs. of butter; while the one on the right, "Strathmore Lassie Sylvia-130501," as a three-year-old produced 2568 lbs. of milk and 958 lbs. of butter.

According to the Dairy Commissioner of the Province of Alberta, the average dairy cow in that province produces 3,950 lbs. of 4 per cent. milk. These five cows produced as much as 32 average Alberta dairy cows. Their milk, sold to the Union Milk Co., Calgary, at regular Dairymen's prices, brought \$3,214.10, with an average of \$642.82 per cow. This

Some very distinguished visitors happened to come along just as this photograph was about to be taken. The two ladies are Dowager Lady Pentland and her daughter, Hon. Miss Sinclair. The gentlemen are Lord Pentland and on the left, George H. Jones, manager of Strathmore Farm.

SUNDAY SCHOOL LESSON

SEPTEMBER 1

EZRA'S RETURN TO JERUSALEM

Golden Text: "The hand of our God is upon them that seek Him, for good." — Ezra 8:22.

Lesson: Ezra 7:3 to 8:36.

Devotional Reading: Psalm 63:1-8.

Explanations and Comments

With the Permission of Artaxerxes, King of Persia, Ezra 7:6-10.

Ezra was a descendant of Seraiah, the chief priest prior to the reign of the last King of Judah, and traced his ancestry back to Aaron. He was in the service of the temple when the Lord God of Israel had given it to him.

He studied the law, and not only copied it but interpreted it. He requested permission from King Artaxerxes to go to Jerusalem in the fifth month of the year.

Ezra was a descendant of Seraiah, the chief priest prior to the reign of the last King of Judah, and traced his ancestry back to Aaron. He was in the service of the temple when the Lord God of Israel had given it to him.

Enthusiastic Over Northern Air Trail

Will Be Aerial Highway Says Pilot Of *Untin Bowler*

North America's aerial commerce between Europe and Asia will centre about northern routes through Canada, Parker Cramer, noted exploration flier, declared with his arrival at The Pas, with two other members of the crew of the *Untin Bowler*, the amphibian plane which was wrecked at Port Burwell en route to Greenland.

Cramer, who was one of the pilots of the "Greater Rockford" on its flight from Rockford, Ill., to Greenland last fall, visions the day when air lanes will cut through the little known regions of northern Canada in a mammoth link with other empires.

The day is not far distant when the northern sky trails will be regarded as the speediest, safest and most feasible links with Europe and Asia, he declares. The *Untin Bowler* party brought to The Pas a story of thrills in the air north. They winged away from Chicago, July 3, in a Sikorsky machine, and landed at Port Burwell, July 9, after an exciting battle with fogs. On July 13, their plane was swept out to sea from its anchorage at the port, and on July 28, they climbed aboard the Canadian Government hydrographic steamer "Acada," bound for Churchill.

The failure of their trip does not indicate that the northern air trail to Europe is unfeasible, Cramer states. Rather did it prove to him that with proper bases established the route is a commercial one in the best sense of the word, he stated.

"The *Untin Bowler* was lost because there were no facilities at Port Burwell for the proper anchorage of our plane," he asserted. "The tide was high and the ice was dangerous. We were forced to anchor our Sikorsky to the ice itself. The result was that when an unusually strong wind blew up July 13, our ship was carried out to sea with the shore ice. With a runway or other proper anchorage facilities at Port Burwell, our amphibian would not have been lost, and we should have undoubtedly completed the first leg of our journey, that is to Greenland."

Safety In Flying

Depends On Pilot and "Plane Used," Says Author

"How Safe Is It To Fly?" is the title of an article written by Herbert Brucker, in the July issue of the "Reviews of Reviews."

The author answers the query with the following statement: "It depends entirely on how, and in what you fly. With a safe craft and a pilot doing same flying the chances of trouble are no greater than when you take a Sunday automobile drive."

Enumerating statistics to prove the small percentage of accidents in connection with same flying, the writer refers to the Canadian Light Airplane clubs. He states, "At the end of last year there were fifteen of these clubs with a combined membership of 2,403, making a total of 25,357 flights, lasting 5,124 hours, or \$12,400 miles of airplane travel. Much of this was student flying, far more dangerous than the flying of qualified pilots, yet the total number of killed was three."

Protecting Standing Timber

As a preliminary experiment, an area of 100 acres in the Indian River District will be "dusted" with calcium arsenite from a Western Canada Airways, Ltd., flying boat. This is being done in an effort to halt the depredations of the hemlock looper, a caterpillar which has been doing great damage to standing timber in the district. Should the experiment prove to be successful, the powder will be used extensively in the area.

In one postal area in the English Midlands where over a hundred thousand packets are posted every day, 600 cannot be delivered owing to careless addresses.

Wife: "I can surely give away this shabby old suit!"

Husband: "Goodness, no! That is the suit I go to the tax-collector in."

—Lustige Kölner Zeitung, Cologne.

Menace of Insects

Entomologist Thinks Modern Transportation Helps To Spread Pest

Dr. Charles T. Brues, who heads the Harvard department of economic Cold Springs Harbor on the menace entomology, has been lecturing at of the insects.

Man periodically renew the control which the boll weevil thrives; he furnished renewed provender for the Mediterranean fruit fly; and it is with the Japanese and Asiatic beetles, the corn borer, the gypsy moth and other contemporary pests. Disproving the predictions of scientists, another cibele of thought, Dr. Brues, declares, according to the Times, that agriculturists "have predicted in 100 years, with the present growth of world population, all the available acreage will be insufficient to feed the world." And he went on: "This time the limits of 100 years, with the serious limits of the insect, are very effective, is likely to be cut appreciably unless more efficient methods of control find all of the old natural barriers are destroyed. The oceans and the mountains once provided impassable corridors for the insects, but the corridors have gone with arrival of modern transportation.

The Zeppelins may cause a wider spread over the oceans of local European insect pests. It is conceivable that the airplane, setting down in this field or that, will further make certain prynchial insects universal."

Made Trip On Bronchos

Two Cowboys Ride From Alberta To The Pas District

Completing a 600-mile jaunt aboard a couple of Alberta bronchos, Jack Spencer and Douglas Parker, western cowboys, arrived at The Pas from Coopers, Alberta. The boys went on to Flin Flon, after disposing of their horses. After leaving the plains Spencer and Parker trudged through the bush country, which is considered almost impassable. The trip, however, though slow in spots, was done without any untoward adventure.

Leaving on July 16, they covered the first 470 miles in 11 days. In the bush country to the west of The Pas they found tough going for a way, but stated that it was quite possible to use the road. Once or twice they got off winter trails and on one occasion got into difficulties around muskegs, and for the most part they travelled right along.

They added that they had to part with their horses, but there was no way of getting through to the Flin Flon.

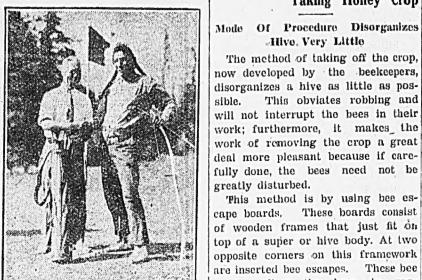

New Brunswick Farm

Hon. Dr. J. D. McLean, former Premier of British Columbia, has just completed his first inspection trip through New Brunswick in his capacity as chief executive officer of the federal Farm Loan Board. He gave it as his experienced opinion that New Brunswick has farm lands that are equal to any to be found in other parts of Canada.

Old Clerk: "We're taking up a collection to give the boss some silver."

New Clerk: "All right—here's two dimes."

Bow versus Golf Club

William Thomson, well-known western golf professional, and Chief Sitting Eagle, of the Storries, differed as to which could beat the other at golf, each armed with his chosen weapon. Sitting Eagle took his trusty bow and arrow; Thomson relied on his golf clubs. At the end of a nine-hole try out the Chief was four up on the pro. His target was of course larger than Thomson's objective and he could and did "hole out" from long range. The contest was staged over one-half of the championship course where the competition for the Prince of Wales Trophy will be staged in the "Canadian Golfer" tour of Canada, starting from Toronto August 12.

Keep On Growing Wheat

Safe To Boost Production To Offset Poor Seasons

Grave suggestions have been made that it would be well for farmers to go out of wheat, and that governments even should step in and compel the curtailment of wheat acreage. And now Nature has shown that all these worries are vain, and that it is necessary to keep on growing wheat, since at any moment, Nature may decree a poor season and, when that comes, the cry will be for more, not less wheat. Joseph, the originator of the first compulsory wheat pool that we hear of in history, realized that, with proper forethought, he did not urge Egypt to curtail her supplies, but he cornered the surplus, doing this out when the lean years came, and thereby, it is said, making himself and his sovereign wealthy and settling aside enough money to finance the exodus.

A Queer Word

Pocket-handkerchief, when you pause to think of it, must be one of the queerest words in the language. At first, it was kerchief (couvre-her) a covering for the head; then it became handkerchief, a covering for the head carried in the hand; and at last pocket-handkerchief, a covering for the head, held in the hand, and kept in the pocket.

Assured Solitude.

In a small town a company of barn-stormers was playing to a meager audience. The villain dragged the shrieking heroine down the stage to the footlights, and in her ear he hissed: "Are we alone?" "No, gavnor," interrupted the lone occupant of the gallery, "not tonight you ain't, but you will be tomorrow night."

Best Method Of Taking Honey Crop

Mode Of Procedure Disorganizes Hive Very Little

The method of taking off the crop, now developed by the beekeepers, disorganizes a hive as little as possible. This obviates robbing and will not interrupt the bees in their work; furthermore, it makes the work of removing the crop a great deal more pleasant because it carefully does not the bees need not be greatly disturbed.

This method is by using bee escape boards. These boards consist of wooden frames that just fit on top of a super or hive body. At two opposite corners on this framework are inserted bee escapes. These bee escapes allow the bees to pass through, but, owing to the construction of the escape, they cannot return. The remainder of the escape board should be wire screening. Some beekeepers use a honey board with a single bee escape in the center; in fact there are various types of escape boards, though they all work on the principle of the one described.

The escape boards are placed on the hives below the lowest super that it is desired to remove. Care must be taken that there be no brood in the supers placed above an escape. The bees will not leave brood. Care must also be taken that there are no chinks or holes in the supers above an escape for the bees leave through the escape, the supers become unprotected and robbing may start.

An empty super or half super is generally given when the escape is put on as the hive will be come too crowded.

Only ripe honey should be put above an escape. Unfinished comb should be left below to be finished off by the bees.

If the weather is bright and the bees are active it should be possible to take off the supers within twenty-four or forty-eight hours after putting on the escapes, and find no trouble in them.

Should Start When Young

II. Music Taught In School Children Learn To Appreciate It

There is only one way to implant a love of music in the citizens of any country, and that is by teaching them, while they are still children, to love and appreciate the best in art. This can best be done by having the little ones make music themselves. The schools are the proper agencies to undertake this work.

The individual effort in this country is good, but we are still a long way from any serious national effort to make us appreciate some of the most delightful phases of life. Music has played a leading part in the development of many nations, and in Canada should certainly not overlook its importance.

Western Steel Products

The new plant of Western Steel Products Limited, has been completed and is now occupied by the company. It was erected by the Pool Construction Company of Regina. In record time. Although the building is only just finished officials of the company think that a still further extension will be necessary shortly if the present rate of progress keeps up.

Compliment To The Dog

Four-Footed Friends Can Teach Man Lessons Of Faithfulness

It pleased Lord Birkenhead, who has attained the years that bring the philosophic mind to entertain an assembly of British dog fanciers by telling them of the devotion and loyalty of a pet "Calm," known as "Jane," which insists upon attending state banquets with her master and whenever he happens to be away traveling abroad. "Jane" loses her appetite, Lord Birkenhead adds that he never knew a man who, because of his absence, refused to eat and drink. It is a compliment to "Toby." Over against the fact, that our word "dog" simply means, in Greek, a dog, we may set the fact that the dog star and dog days seasons have been named after our four-footed friend; and "faithful as any dog" has become, not without good reason, a proverb in our language. A writer in Temple Bar says: "From the investigations I have made upon the subject the record of literary men and women who have experienced and reciprocated the devotion of their dogs, would furnish the material for many books."

The escape boards are placed on the hives below the lowest super that it is desired to remove. Care must be taken that there be no brood in the supers placed above an escape. The bees will not leave brood. Care must also be taken that there are no chinks or holes in the supers above an escape for the bees leave through the escape, the supers become unprotected and robbing may start.

An empty super or half super is generally given when the escape is put on as the hive will be come too crowded.

Only ripe honey should be put above an escape. Unfinished comb should be left below to be finished off by the bees.

If the weather is bright and the bees are active it should be possible to take off the supers within twenty-four or forty-eight hours after putting on the escapes, and find no trouble in them.

On Long Route March

Ex-Soldier From Newfoundland Taking Around World On Bet

There recently passed through Glasgow, Scotland, an ex-soldier engaged in one of the longest route marches ever known. He is Andrew Robe McWhyle, son of a Scotsman engaged in the fishing industry in Newfoundland.

He is walking round the world, a distance of 25,600 miles, for a wager of \$40,000. The conditions are that apart from necessary sea voyages he must travel the entire distance by foot, and must not even accept a friendly lift on the road. He must also earn his own living.

He carries a small tent and cooking utensils, and rarely sleeps indoors.

"I am forty-three years of age," he told an interviewer, "but I feel as fit as a boy of twenty."

"I have many thousands of miles to walk yet, but I am not in a terrible hurry. Apart from the \$40,000 awaiting me I am thoroughly enjoying the experience, and, even if the bet were cancelled for some reason or other, I should still carry on."

The Real Canadians

According To Census Takers, Only Indians Can Qualify

A correspondent of the Vancouver Sun recounts being told by a United States immigration agent that the only "real Canadians" are Indians.

That is, of course, zero in courtesy and does not represent either the officer or general attitude of the United States. But it is technically the truth, according to our own census takers. In that collection, made every 10 years, no one can be defined as a "Canadian."

Small Fee Cavers Tip

The Mitropa, the company which conducts the dining and sleeping cars on the lines of the German Railroad Company, announces that the employees in its restaurants have been granted an adequate wage and that tips have been done away with. A small fee in lieu of tips, running from 6 to 48 cents according to the class, will be added to the price of the berth tickets, and the tickets will bear a notice to the effect that no tips are to be given.

A Fine Southeast

Pat—That was a fine sentiment. Cassey got off at the banquet last night.

Mike—What was it?

Pat—He said that the sweetest memories in life are the recollection of things forgotten.

Los Angeles County has 50 airports and landing fields.

Canada's Trade With Britain

Figures Show Decrease For First Six Months Of 1929

Canada's share in the foreign trade of Great Britain for the first six months of the present year is regarded as "slightly disappointing" by Harrison Watson, Canadian Trade Commissioner in London, because, contrary to general expectation, the total shows no increase over 1928.

The figures published, show that both Canada and the United States fell off noticeably in wheat exports to the United Kingdom, their being practically balanced by Argentina's and Australia's gains. In this respect, during these six months, Britain imported a total of 53,497,200 bushels, Argentina had 19,108,940 bushelsweight, Canada came next with 15,841,175, while the United States supplied 9,422,430, and Australia, 7,602,923 bushel-weight.

That the British bacon market is still unattractive to Canadian packers was apparent even from figures which show Canada far below other exporting countries in the market for bacon. The figures are: Denmark, 2,365,446 bushel-weight; Netherlands, 502,224; United States, 309,380; Canada, 94,664. This is also noted, the Irish Free State now taking care of practically the whole of her outside requirements. Canadian bacon has disappeared from the list for all practical purposes.

On the other hand, Canada still contributes more than half of all four imported by the United Kingdom; there has been a marked advance in the quantity of barley from the Dominion; while Canada's shipments of oats are far in excess of other countries. Contributing on Canada's apparent inability to produce goods in sufficient quantities to supply the British market, W. Waldron, markets commissioner in the provincial department of agriculture, remarked: "It seems that we are not making the most of our opportunities as a producer if we cannot supply Great Britain, and if other countries are securing the major share of the business."

"But if Canada does manage to achieve an exportable surplus of bacon, ham, eggs, butter and poultry, will such surplus be exported to Great Britain?" The exporter is interested in the best market he can find, and the swing of the United States trade may cause him to turn to Great Britain, but something more is needed. As much information as possible on the requirements of the British market should be made available. This would create interest and keep that market constantly before the eyes of Canadian producers. Saskatchewan has already done a good deal in this direction, but it is something to which the Dominion and provincial governments could perhaps pay greater attention."

A Considerate Neighbor

A newcomer to Liberal was careful to specify to the real estate man that he wanted a house close to town but one that was at least a half mile away from any other dwelling.

"Ah, I see," said the agent with an understanding smile, "You want to practice the simple life, don't you?"

"No," answered the newcomer, "I want to practice on the corner."

Canadian Fish For England

A record shipment of 150,000 pounds of River St. Lawrence salmon was shipped recently from Quebec to the British Isles. This salmon is frozen by a new process that does not affect the flavor of the fish in any way. It is expected that weekly shipments of about 100,000 pounds of this salmon will be made to the British markets.

"But, waiter, is it usual to serve sausage with your dinger on it?"

"But, sir, it has walked off the plate twice already." — Hittman, Hamburg.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, the singing walter at Blakie Joe's New York night club, has written a love song to Molly White, the famous Broadway dancer, fully because he is only a waiter. Finally he goes to the floor and renders the ballad himself, hoping to touch her heart. Marcus, the famous Broadway producer, is in the audience and comes to buy a ticket. Molly makes up to Al, so the latter insists that Marcus hire Molly to sing the number in one of his reviews. Marcus agrees. Grace, the little crippled girl, is in the room when she finds Al is leaving, for she is deeply in love with him. Al and Molly marry and both score success on Broadway. Once Al visits his old friends at Blakie Joe's, and Gracie delighted to see him. Then he returns to Molly's dressing room on a Broadway theatre. She is with his friend, John Perry. Al does not see John surreptitiously press Molly's hand as all three leave together.

CHAPTER X.

They descended the elevator from the Manhattan Roof Theatre to the street, where Al looked around for a taxi. John Perry, following after, took Molly's arm, guiding her through the dense after-theatre crowds toward the curb.

Broadway was at its best—two wide currents of human beings moved compactly up and down beneath the brilliant canopy of lights from electric signs. There was romance in the crowds, and power, and feelings of dreams carried from the theatres that dotted the Street of Lights. There were shrill cries for taxis, the giggles of girls leaning on the arms of their escorts, the piercing whistle of the traffic cops stopping and starting the never-ending line of motor cars as the lights went from green to red, and back again. A happy, carefree spirit distinguished the crowd. But Molly, turned bare eyes on this fantastic display of modern Babylon as she walked impatiently for the taxi.

"Why doesn't Al hurry and get one?" she inquired petulantly of John Perry.

"Steady, sister. He's doing the best he can," answered Perry.

But now a taxi driver saw Al's beckoning hand and swiped up to the curb. They piled inside and the driver sped away toward the palatial skyscraper apartment in the fifties where Al and Molly lived. Molly snuggled down between the two men.

"Al," she remarked after a moment, "why do we always have to travel in taxis? Why can't we have a limousine and a chauffeur of our own. Everybody else does."

Al did not notice the complaining note in her voice. "I've been thinking that same thing—we can swing it easily now. Tomorrow you can pick one out. What kind?"

"I was thinking of a Rolls-Royce," said Molly eagerly.

Al hesitated and Perry gave a little laugh.

"Nothing cheap about Molly," said the racketeer.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The acid must be over-eliminated. Too much acid makes the stomach and intestines sour.

Alka kills acid instantly. The best form is Phillips' Milk of Magnesia. It can't burn the stomach, because it has less acid. Each dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. But you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save your life.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

It's bound to mean the greatest happiness in the world to both of us. Don't you see that?"

"No, I don't. I see that it will ruin my career, I'll have to leave the show in a little while and while I'm gone Marcus will get a new ballad singer. People will forget me by the time I'm ready to come back. And how do I know Marcus will give me back my job? I have the best spot in the show now. Your point of view is just plain selfish, because the whole thing doesn't affect you. But I see the other side."

Al stared at her bewilderedly for a moment. Then he said quietly:

"Molly, your nerves are on edge or you wouldn't talk that way. You don't have to be afraid—Marcus will always put you in as his headliner. He knows I wouldn't write another song for him if he didn't. But he wouldn't think of giving you the go-by, anyway. He knows what an attraction you are!"

Al paused to regard Molly with a reassuring smile, but she did not see it. Her eyes were fixed sombrely upon the floor.

A helpless look passed across Al's face.

"As for me being selfish," he said humbly, "well, perhaps I am. But I don't mean to be. I simply adored you, Molly, and it would give me the greatest happiness I can think of for us to have a child. It would make all we have achieved seem worth while."

Molly rose wearily, "I'm going to bed."

Without kissing Al good night or even looking at him, she walked slowly toward her bedroom, her head dejectedly forward. He heard her bedroom door slam sharply.

Instead of going to his own room and undressing Al lit a cigarette and paced the floor. Al first was agitated and worried about Molly. But gradually he argued himself out of the disturbed state of mind. After all, it was natural that she should be upset. Perhaps the strain of her nightly performances was too much for her. In the morning this cloud would pass from her.

He finished his cigarette, put out the lights and went to the drawing room window, whence he could look out on the yellow glow from the city lights.

As he stood by the window, dreaming, meditating, already planning the future of the child that was to belong to him, he heard the tinkling of the phone in Molly's room. Her door must have opened for he heard Molly's faint voice:

"No, no. You mustn't call me."

"Before Molly hung up Al thought he caught the word 'John.' But no, he must have been mistaken. John Perry wouldn't be calling up at this hour."

(To be Continued)

Broadcast Sensations

Of Parachute Jump

Man Started To Talk At Height Of 10,000 Feet

The sensations experienced by a parachute jumper were broadcast from Roosevelt Hall, New York, by Henry G. Bushmeyer, while he was plunging to earth from a height of 10,000 feet. It was believed to be the first experiment of its kind.

Bushmeyer carried a 24-pound short wave transmitting radio strapped to him, and held the microphone in his hand. When he stepped off his airplane 10,000 feet up, he started to talk into the "mike" and the words were picked up on the field by a short wave set, transmitted to the New York studio of the National Broadcasting Station, and then sent out over a network of stations.

If one is troubled with corns, he will find in Holloway's Corn Remover an application that will entirely relieve suffering.

Judged By Newspaper

No one can deny it. A city is also judged by its newspaper. If its newspaper has a standard in its treatment and display of news, in its features and in its editorial column, these facts soon make their impression. If the newspaper is insufficient, the city will suffer. No institution has a more serious relation to a city's reputation than a city's newspaper.

After Two Years

A bottle thrown overboard from the liner "Celtie" in July, 1927, has been found at Rocheford, France, after two years bobbing over the sea. It had been tossed overboard at some point between New York and the Azores, and the Gulf Stream has carried it across the Atlantic.

Some desert plants contain water which travellers find useful in quenching their thirst.

Minard's Liniment for Neuralgia.

Plan Nation Wide Broadcasts

Canadian National Railways Have Ambitious Program Mapped Out

"That the next twelve months will see the greatest advance in broadcasting in Canada that has ever taken place since the commencement of the art a few years ago" is the prediction of W. D. Robb, vice-president, Canadian National Railways, in whose department radio is included.

"Two major factors will bring this about" continued Mr. Robb. "The extension of regular weekly schedule of network broadcasting on a national scale, and a marked improvement in programmes generally, and especially by providing more opportunity for Canadians to hear outstanding talent from their own country.

"I can only speak for the Canadian National Railways, but as the nation's greatest broadcaster, now operating thirteen stations and owning the only system of wires adapted for broadcasting under one direction stretching from Coast to Coast, we are planning to institute marked improvements ourselves and to co-operate in every way possible to assist other broadcasters in doing similarly. Commencing in October, we are planning to extend our National network three times weekly from the Maritimes to the Rocky Mountains, and once or twice from Atlantic to Pacific."

"These regular weekly national broadcasts should go far to create a better mutual understanding among the Provinces, unite more closely the elements and interests within our country and remove the feeling of isolation felt in not a few communities."

Making Long Trip

Party From Jasper Covering Historic Fur Trade Route In Specially Constructed Canoe

With a specially constructed canoe, "Curly" Phillips, well known guide of Jasper National Park, is taking a party of five Americans from the east on a thirteen hundred mile trip through the waterways of the north country, commencing at Summit Lake behind Prince George, B.C., and finishing at Waterways, Alberta, on the Athabasca River. The party will cover the historic route of the fur traders by which many of the early travellers into Western Canada, during the first half or the last century, reached the Pacific Ocean.

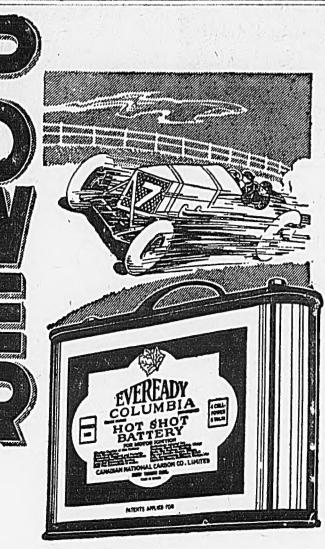

KEEP CHILDREN WELL DURING HOT WEATHER

Little Helps For This Week

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colds and stomach troubles are fits at this time and often a precious little life is lost after a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach trouble.

They kingdom of heaven is not come when God's will is our law; it is come when God's will is our will. While God's will is our law we are but a kind of noble slaves; when His will is our will we are free children.

Philemon had gone forth to see the world, and he had seen it; and he had learned that God's kingdom was not a kingdom of fanatics yelling for a doctor, but of willing, loving, obedient hearts.

They're brutes for punishment—these Eveready Hot-Shots in the metal cases! Full of fire from start to finish. Best for gas engine, motor boat or tractor ignition. Protected by water-shedding metal cases, rain or dampness will not reduce their efficiency. Look for the name Eveready on each battery. It's your guarantee of satisfaction and longer life.

A Valuable Seed Pod

Price Of Rare Orchid Is Estimated At \$150,000

Probably the most valuable flower seed pod in the world was recently on display at the Chelsea Flower Show, London, England. A single flower sprang from one of the seeds sold for more than \$1,500, and others sold for \$1,000. It is estimated that the entire pod with seed is worth \$150,000. The pod is the fertilization of a rare orchid, the Miltonia Amazonica.

A commercial fertilizer plant to cost \$7,000,000 is to be built at Trail, British Columbia.

Higher education in Canada is carried on in 23 universities and 85 colleges.

Priceless Relics Preserved

Sweden Has Richest In World Protected By Laws

Sweden's prehistoric relics are the richest in the world, and this is because the same race has inhabited the country for about 15,000 years, says Professor Curman, State Archaeologist. The scientific museums of Sweden contain more than half a million treasures of antiquity. The structure of the landscapes, with patches of fertile soil lying among barren areas, thick forests or craggy hills, has also helped to preserve these materials of ancient days. These natural obstacles have kept farmers from encroaching upon the sites where prehistoric tombs, fortifications and Viking stone runestones have been hidden. Moreover, the Swedish Government realized 300 years ago the importance of preserving relics of antiquity and enacted laws to that end.

Might Congest Traffic

A western town is strong for safety first, having a bylaw which reads as follows: "When two cars come to a crossing both shall stop and neither shall start until the other is gone." If this is carefully observed, there will be few collisions, but some slight traffic congestion may result.

ASPIRIN
Aspirin is a trademark registered in Canada

WHEN a cold or exposure brings aches and pains that penetrate to your very bones, that is always quick relief in Aspirin. It will make short work of that headache or any little pain. Just as effective in the more serious cases from rheumatism, neuralgia, rheumatism or lameness. No such pain is ever too deep-seated for Aspirin tablets to relieve, and they don't affect the heart. All druggists, with proven directions for various uses which many people have found invaluable in the relief of pains and aches of many kinds.

Many Farewell Parties For Those Leaving Chinook

Mrs. Robinson and Mrs. Lee
entertained on Tuesday evening
of last week at the home of the
former. Mrs. J. Cooley was the
winner of the first prize (a pretty
syrup jar), and Mrs. Bacon second
with a box of stationery.

A community party sponsored
by the Cadet Club was held Thurs-
day night in the school. Court
whist was played, the winners of
the first prizes being Mrs. Dawson
and W. A. Todd, whilst Mrs.
Thompson and Mr. Lloyd shared
the consolations.

After a social hour was spent
Mr. Chapman in a short speech

Banff Festival Artists

Herbert Hewston
Stanley Hoban
Mary Frances James

These artists will appear at the
Banff Scottish Music Festival to
be held at the Banff Springs Hotel
August 30 to September 2, sponsored
by the Canadian Pacific Railway.
Mrs. Frances James, who will take leading parts
in the ballad opera by Dr. Healey
Willan woven around the story of
Bonnie Prince Charlie and Flora
MacDonald. Stanley Hoban,
Winnipeg harpist, and Herbert
Hewston, tenor, will be among
the assisting artists.

In addition to the Music Festival
there will be the Highland Gather-

ing of pipers from most of the
Canadian Scottish regiments who
will compete for the Banff Trophy,
the winner of which represents the outstanding piper
of the year in Canada. Further, there
are Highland Games staged
such as tossing the caber and all
the usual contests which make the
great annual meet in Scotland.

The Festival is in short a getting
together of the Scottish race from
all over Canada and is patronized
by visitors from all parts of the
North American continent.

Various parties were held during
the week by girls of the town to
take farewell of Dorothy Carter.
Mildred Milligan entertained a few
young girls at a tea; Inn Rennie
at court whist, and Marjorie Lee
at court whist. The prize winners
at Inn's party were Ruth Bude and
Urline Brownell, with Betty and
Mildred Milligan receiving the
consolations. When Marjorie en-
tertained the prize winners were
Vildren and Betty Milligan, with
Marjorie Lee and Vera Clipsham
sharing the consolations.

Triplets Born to Calgary Woman

Cereal, Aug. 26—Mrs. John
McAndrew of 1041 Eighth street
east, Calgary, gave birth to triplets,
two girls and a boy, Monday, while
on a visit with her mother here.
Mrs. Youngren, of Kinnmundy
district.

Miss Nolan of Peyton school
left last Saturday for her home at
Turin.

LOCAL ITEMS

Monday, Sept. 2nd, Labor Day

School opens Tuesday, Sept. 3.

J. McAndrew of Calgary arrived
Wednesday and is spending a few
days at Kinnmundy with relations.

Mabel Young visited her sister,
Miss Margaret Young, at Hanua
last week.

Last week Harry Lloyd pur-
chased the building north of the
hotel which was formerly used as
a butcher shop.

Bernard Knibbs has moved into
the house vacated by H. Lloyd

Harvest is in full swing and so
far the weather has been ideal.
The yield is turning out some bet-
ter than was expected, and wheat
is grading from 1 to 3 northern.

A few ladies from town motored
Wednesday out to the home of
Mrs. Richard Stewart, spending a
most enjoyable afternoon. Mrs.
Stewart's niece, Miss Edna Stewart
of Naco, is at present visiting with
her.

Miss Nolan of Peyton school
left last Saturday for her home at
Turin.

Mr. and Mrs. Marr of Vancouver
are visiting in the district at
present.

THE FORD CAR SIX-BRAKE SYSTEM

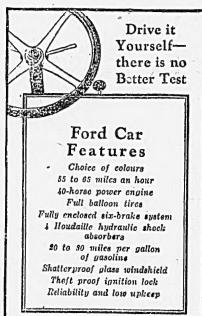

Grips with Silent Power

THE greatest safety feature on any automobile—the braking system—has been developed on the Ford car to a degree that insures absolute driving confidence. Being fully enclosed, the internal expanding brakes on all four wheels are free from any danger of impaired performance from mud, sand, road dirt, grease or other foreign matter entering the mechanism or between the bands and drum.

The four wheel system is operated by a foot pedal, while the emergency or parking system of two brakes, one on each rear wheel, is distinct and separate, operated by a hand lever. This added security is made possible through the unique design of the Ford steel spoke wheels to which drums are fitted to accommodate two sets of internal brakes on the rear wheels.

The smooth, even braking of the Ford car yields more advantages than maximum safety at all times, since it makes tires last longer and adds immeasurably to riding ease and driving comfort.

Arrange for your demonstration ride with the nearest Ford dealer
